

## SPEAKER BIOGRAPHIES

### **Scott Curtis**

---

Scott Curtis lives and works in Boise, Idaho. He is the CEO of Idaho Youth Ranch, a statewide not-for-profit that has served Idaho's most vulnerable youth and families since 1953. The Idaho Youth Ranch is focused on providing accessible programs and services that nurture hope, healing, and resilience.

From 2005 to 2019 Scott served in various capacities for the Treasure Valley Family YMCA. His final position was Vice President and Chief Advancement Officer, overseeing development, strategic planning, growth, partnerships, marketing, and communications.

### **Matthew Bell**

---

Matthew Bell serves as Vice President, Idaho Regional Director for PacificSource Health Plans. In this role, Matt serves as a member of the organization's executive management group with responsibilities for all health plan activities in the state of Idaho, as well as executive leader for issues related to media, legislative, regulatory, business, key provider interactions, and community activities. Matt began his duties with the organization in December 2017.

Prior to joining PacificSource, Matt most recently held the position of Regional Account Executive focused on outreach and network development for University of Utah Health Care, where he worked with hospitals and physicians throughout Idaho, Montana, Nevada, and Utah. Prior to holding that position, he was a Senior Partner with White Cloud Analytics in Boise. He also has 13 years of experience in various leadership positions with St. Luke's Health System in Boise, Idaho.

Matt earned his Master of Healthcare Administration degree at the University of Minnesota and a Bachelor's of Science in political science at the University of Utah. Outside of work, when he isn't coaching or attending his son's lacrosse and football games, he enjoys mountain biking, skiing, and playing golf.

### **Ron Oberleitner, MBA**

---

Mr. Oberleitner is a former VP Product Development from the Medical Device industry, where he supervised Styker's Telesurgery and Telemedicine services for the craniofacial, select orthopedic & neurosurgery industries. After his son was diagnosed with autism, he became Principal Investigator on multiple telehealth research projects funded by NIH, US Air Force, and Autism Speaks to develop telehealth applications to increase education and access to healthcare for people with autism, and other health conditions including PTSD and dementia.

He is a widely-published expert on the use of health informatics and telemedicine for autism and related behavioral disorders. Ron is also currently the CEO of Idaho-based Behavior Imaging® - an Idaho-based leading telehealth technology company specializing in next-generation telehealth solutions for behavioral disorders. He is a board member on Idaho's State Rehabilitation Council and Global Ties Idaho, and has served and/or chaired the Idaho Assistive Technology Project board for 10 years.
